When traveling this radio is always there letting me no of grid lock in an area I am about to enter and the weather in same local. As you are driving it is very hard to find a local stations that can give you this information without the static you find on many low voltage station. I plead with you as a xm radio, please do not make those of us who are lucky enough to have it to, go back to the search to find a station with such information and the clarity to hear it.

Thank you,

Deanna L. Johnson
